EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Thomas Brindisi (310) 439-2901 on 3/5/2005 @ 5:25pm EST.

The application has been amended as follows:

A. In claims 1, 17 and 19 replace the entire section d) of each claim with the following:

d) an initiator electrical interface attached to said control circuitry, said interface including an exposed portion not enclosed within said initiator body, wherein the only exposed electrical contacts are directly lateral to at least part of said control circuitry.

B. Cancel claims 11-16 and 20

C. Change the dependency of claim 21 from claim 20 to claim 19.

2. The following is an examiner's statement of reasons for allowance: the prior art of record neither teaches nor suggests all of the claimed subject matter of claims 1, 17 and 19 including an initiator electrical interface attached to control circuitry, said interface including an exposed portion not enclosed within an initiator body, wherein the only exposed electrical contacts are directly lateral to at least part of said control circuitry.

In that regard neither Aureal et al. nor Perotto et al. contain control circuitry and in addition Aureal et al. contains an electrical contact (14) that would not be directly lateral to said control circuitry if in fact Aureal et al. were capable of containing such control circuitry.

The prior art of record neither teaches nor suggests all of the claimed subject matter of claims 17 and 19 including a combination of a mating connector and an initiator wherein the mating connector is enlarged as that term is used in the present specification, which refers to its unique enlargement that accommodates an enlarged initiator containing on-board circuitry (this language renders the claim a combination claim).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel L Greene Jr. whose telephone number is (703) 605-1210 until April 6th, 2005 at which time it will change to (571) 272-6876. The examiner can normally be reached Monday thru Friday 8:30am - 5pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael J Carone can be reached on (703) 306-4198. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
